

NOTES.

- Elevation indicates approximate ground surface at boring location. Elevations are based on the datum of Mean Lower Low Water.
- Soil classifications are in accordance with Military Standard 619B "Unified Soil Classification System" revised 12 June 1968.
- Field visual classifications and descriptions as described by the inspector are shown to the right of the log.
- Soil symbols shown on the LC Column are based on laboratory visual classification with test data on selected samples.
- For boring locations see sheet 8 for borings 7F-1 through 7F-8; sheet 42 for borings B-1 and B-2.
- Soil exploration, testing, and analysis performed by SF District, Corps of Engineers for borings 7F-1 through 7F-8. Soil exploration and identification for borings B-1 and B-2 performed by A/E.

LEGEND.

- γ_d = Dry density (pcf)
- W = Moisture content (%)
- LL = Liquid limit (%)
- PL = Plastic limit (%)
- LC = Laboratory classification
- Gr. 10 = 10% gravel.
- Sa. 20 = 20% sand.
- Fi. 70 = 70% fines.
- U = Undisturbed push-tube sample.
