

CONTRACTOR’S INQUIRY RESPONSES

**THE HARMONY COURT
 MEDIAN LANDSCAPE IMPROVEMENTS
 EDEN TOWNSHIP, ALAMEDA COUNTY, CALIFORNIA**

The responses to contractors' inquiries, unless incorporated into a formal addendum to the contract, are not a part of the contract and are provided for the contractor's convenience only. In some instances, the question and answer may represent a summary of the matters discussed rather than a word-for-word recitation. The responses may be considered along with all other information furnished to prospective bidders for the purpose of bidding on the project. The availability or use of information provided in the responses to contractors' inquiries is not to be construed in any way as a waiver of the provisions of section 2-1.07 of the Standard Specifications or any other provision of the contract, the plans, Standard Specifications or Special Provisions, nor to excuse the contractor from full compliance with those contract requirements. Bidders are cautioned that subsequent responses or contract addenda may affect or vary a response previously given and any such subsequent response or addenda should be taken into consideration when submitting a bid for the project. Inquiries must be submitted by the deadline specified in the project Special Provisions.

This document will be continuously updated. It is the contractor’s responsibility to check for updates.

UPDATED (06-5-2023): *(Legend: T = telephone; PBM = pre-bid meeting; E = email)*

Inquiry No.	Inquiry	Response
1PBM	Where do we go to get the list of attendees?	List of Attendees will be made available via County's project website: .
2PBM	When does the County want to start the Project?	Mid-June/Early July 2023
3E	I have a quick question on this bid. Do we have to include import topsoil for planting as per the details, or can we assume amended site soil? If we have to include import topsoil, what should be soil depth? Please clarify.	As shown on Details 2 and 3 on Sheet 8, each planting hole is to contain a mix of 70% imported topsoil and 30% organic compost. The soil depth in each hole would depend on the container size. As shown on the detail, the rootball rests on native soil, and the planting hole is 1-1/2 times wider than the rootball.
