

Prepare for Winter Storms

BEFORE THE STORM

Preparing For A Pending Storm Event:

- Track weather conditions
- Keep your car fueled: if electric power is cut off, gas stations may not be operable.
- Keep your cell phone charged. Have a car charger on hand.
- Check your emergency supplies (first aid kit, essential medicines, cash, food, water, non-electric can opener, portable radio, flashlights, and spare batteries) and ensure they are in air-tight bags and in handy locations
- Clear debris from storm drains. Keep a rake on hand to clear debris that may clog storm drains during rain storms.
- Secure or remove items that can blow around.
- Keep garbage cans and cars at least one foot from the curb to avoid blocking stormwater flows.
